

Tip 12

Shading White Objects

When using white for fences and gates, create dimensional shading by using Easy Blend Baby Blue or Easy Blend Neutral Grey.

Apply the white acrylic paint over a base coat of DA005 Taffy Cream. Use a foam roller for the application of both colors. Two roller refills will be needed. It will take a few layers of white to get a real opaque print. Dry the paint in between layers by using a hair dryer.

When the paint is dry, shade the edges lightly with the Easy Blend. Use a paper towel to soften out the application.
